# 5 Tips To Build In Storyline Like A Pro

1

## Utilize Built-In Features

Storyline uses a wide variety of built-in features, like states and buttons. These features give authors the ability to work off of pre-loaded content, while still being able to customize it.

2

## Take Advantage Of Labeled Graphic Interactions

Labeled Graphic Interactions help learners identify the key elements of an image. They help keep content organized, make working with a team easier, and make troubleshooting issues more convenient.

3

## Spend Time On eLearning Heroes

eLearning Heroes is a great solution to feeling overwhelmed with challenges you may encounter in Storyline. It's the #1 user-based community for eLearning creators that features articles, blogs, and webinars to help you through your journey.

4

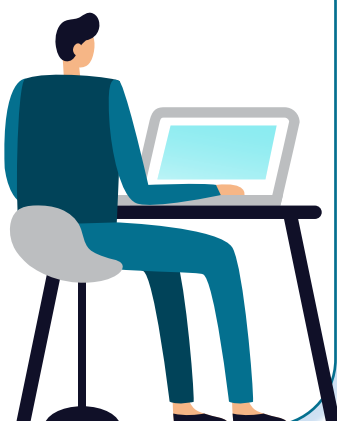

## Participate In eLearning Challenges To Spark Ideas And Creativity

Within the eLearning Heroes community, there are weekly challenges to help Storyline users flex their design muscles. These challenges reinforce your existing knowledge and spark creativity for your own eLearning course design.

5

## Practice, Practice, Practice

You know what they say. Practice makes perfect. The best way to become more proficient in Storyline is to actually use it.
