

ROBERT BASKETTE

CHIEF TECHNOLOGY OFFICER / FOUNDER

Robert Baskette founded Roundtable Learning in 1998 as a learning management technology company. He led the vision and technical growth of the organization.

He assembled and led teams to create enterprise software and technology frameworks to increase engagement, measure performance, and advance organizational goals.

As the CTO at Roundtable Learning, Robert oversees the maintenance and growth of Roundtable's technical capabilities internally and with our customers.

Robert works closely with Scott Stachiw, Director of Immersive Learning, to push the boundaries of learning technologies.

Robert's newest product builds on his learning management development expertise, Mercury Extended Reality System - a revolutionary tool to manage, deliver, and report on extended reality training.

Mercury XRS helps make Virtual Reality and Augmented Reality Training attainable for global enterprises by providing a scalable platform that makes extended reality technologies easy.
